

Prenatal Developmental Toxicity Testing of Petroleum Substances Using the Zebrafish Embryotoxicity Test

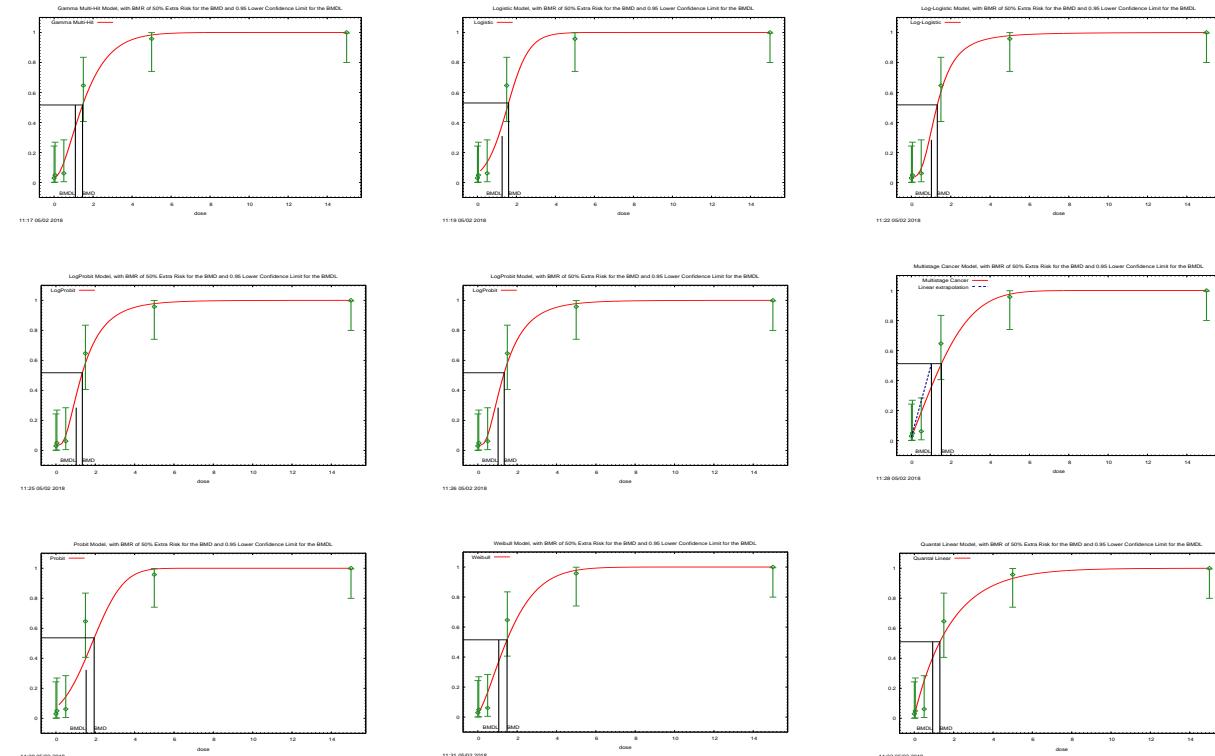

Supplementary Data

Appendix A: Results from concentration-response modeling of the data on zebrafish embryo test (ZET) of 9 petroleum substances (PS) extracts

Tab. A1: Results from a BMD analysis of the data on ZET of sample #034 – heavy fuel oil (HFO)

The table presents the benchmark concentration for 50% effect on differentiation (BMC50) and the 95% benchmark dose lower confidence limit (BMCL50) values for a BMR of 10% extra risk with characteristics of the model fit. The selected model (BMC/BMCL < 3, lowest AIC) is given in bold.

Appendix C: Results from the ZET of samples tested in the present study: DMSO-extracts of 9 PS and 2 GTL products

0.25% (v/v) DMSO was used as solvent control for the ZET. The ZET results are presented as mean fraction of total general morphology scoring (GMS) system at 96 hpf. Results represent at least four independent experiments ($n \geq 4$) and are presented as mean \pm standard error mean (SEM).

Concentration (μg raw material/ml)	#034-HFO		#097-DAE		#098-DAE		#099-DAE		#171-GO		#172-GO		#175-VTO

Appendix D: Aromatic ring class (ARC) profiles of petroleum substances and GTL products tested in the present study

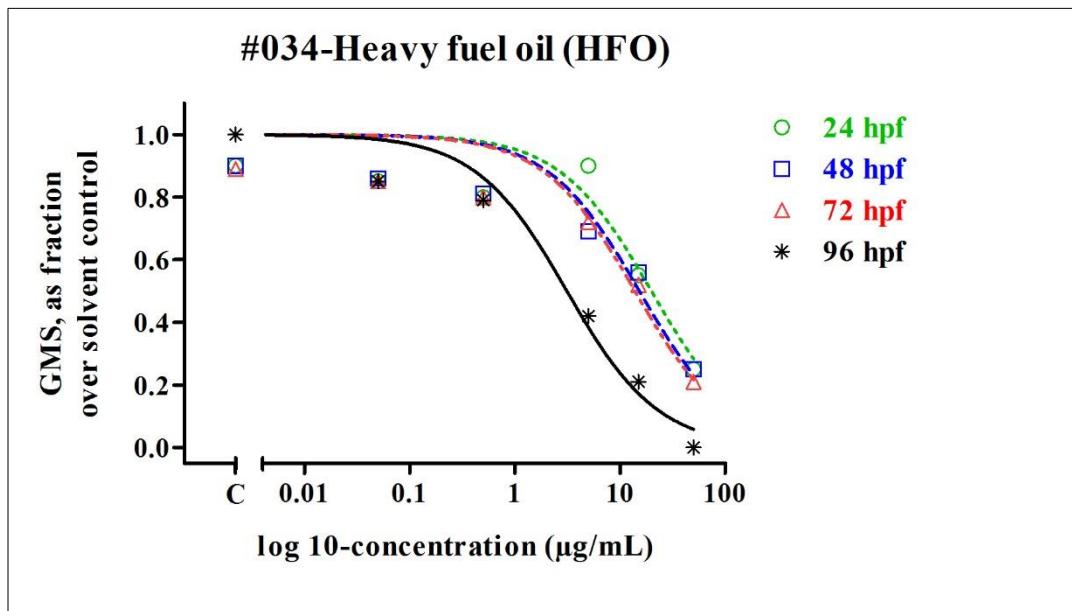

Compound	ARC profile ^a							Total wt.%
	1-ring wt.%	2-ring wt.%	3-ring wt.%	4-ring wt.%	5-ring wt.%	6-ring wt.%	≥ 7-ring wt.%	
#034/HFO	0	1	24	40	21	11	3	48
#097/DAE	0	2	1	6	22	36	33	9
#098/DAE	0	0	18	49	29	4	0	9.7
#099/DAE	0	0	22	41	25	11	1	12
#171/GO	0	12	76	12	0	0	0	5.5
#172/GO	0	20	77	2	0	0	0	4.2
#175/VTO	1	56	43	0	0	0	0	6.7
#185/RAE	0	4	4	4	16	30	42	1.5
#186/RAE	0	0	1	6	18	38	36	3.3
#091/GTL _b	0	0	0	0	0	0	0	0
#092/GTL _g	0	0	0	0	0	0	0	0

^aThe weight percent of the DMSO-soluble 1- to ≥7 aromatic-ring compounds present in each petroleum substance, from the starting material of 4 gram samples, as determined by Method II chemical characterization procedure (see Section 2.2).

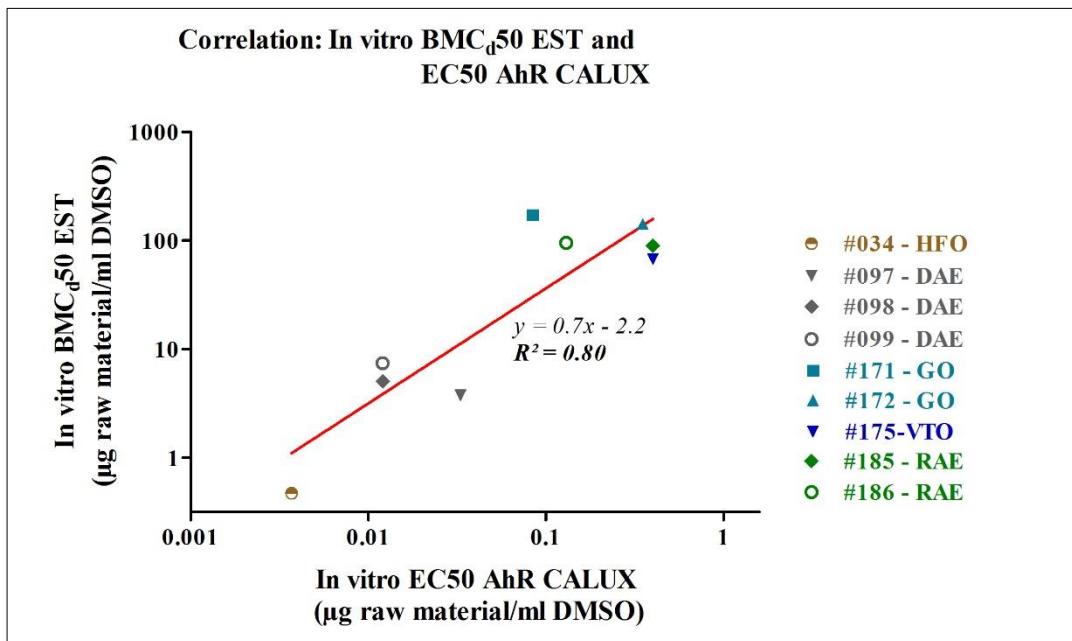

HFO, heavy fuel oil; DAE, distillate aromatic extract; GO, gas oil; VTO, vacuum tower overhead; RAE, residual aromatic extract; GTL-b, gas-to-liquid base oil; GTL-g, gas-to-liquid gas oil, wt%, weight percent

Appendix E:

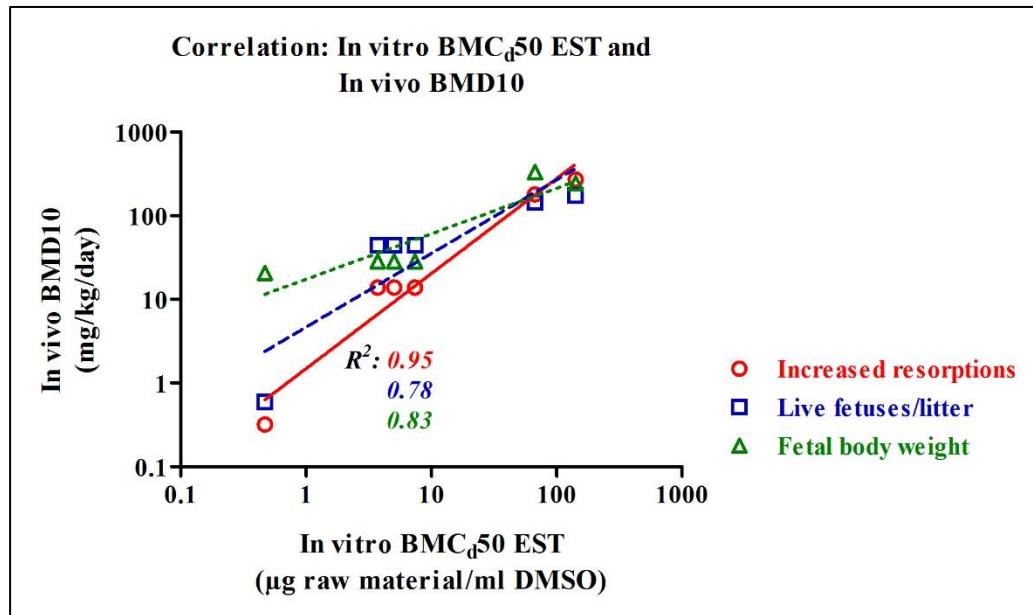

- Concentration-dependent effects of DMSO-extract of sample #034-HFO in the ZET at 24, 48, 72, and 96 hpf, based on the general morphology scoring (GMS) system.

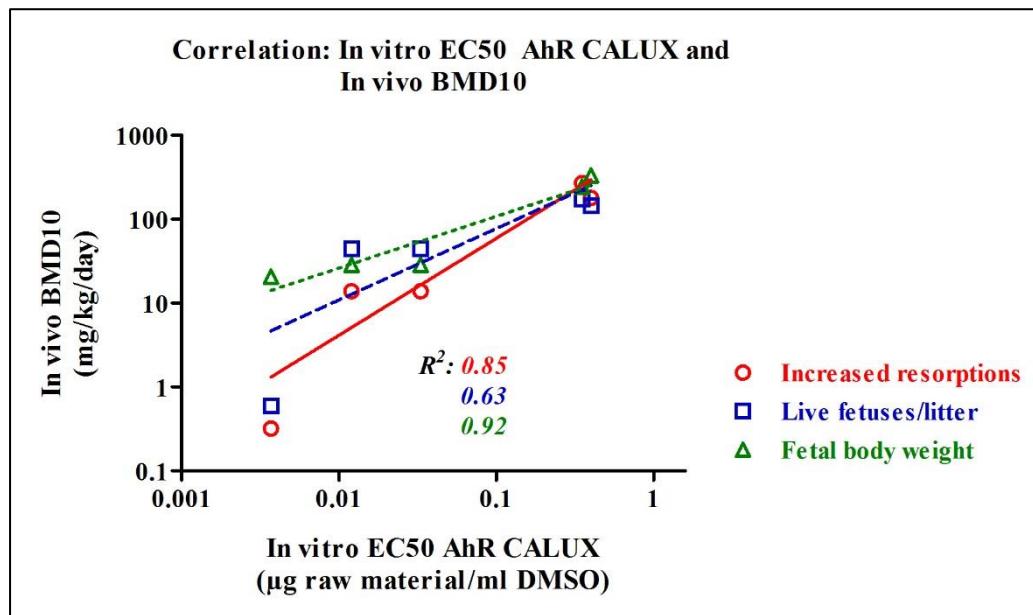

- Correlation between *in vitro* potencies in the EST and AhR-mediated activity of the DMSO-extracts of 9 PS (Kamelia et al., 2018).

- Correlation between *in vitro* potencies of the DMSO-extracts of 9 PS in the EST and potencies observed *in vivo* of the same substances, based on three different developmental endpoints: increased resorptions, number of live fetuses/litter, and fetal body weight (sum and average of the three correlations: 0.85).

- Correlation between AhR-mediated activity of the DMSO-extracts of 9 PS and potencies observed *in vivo* of the same substances, based on three different developmental endpoints: increased resorptions, number of live fetuses/litter, and fetal body weight (sum and average of the three correlations: 0.80).

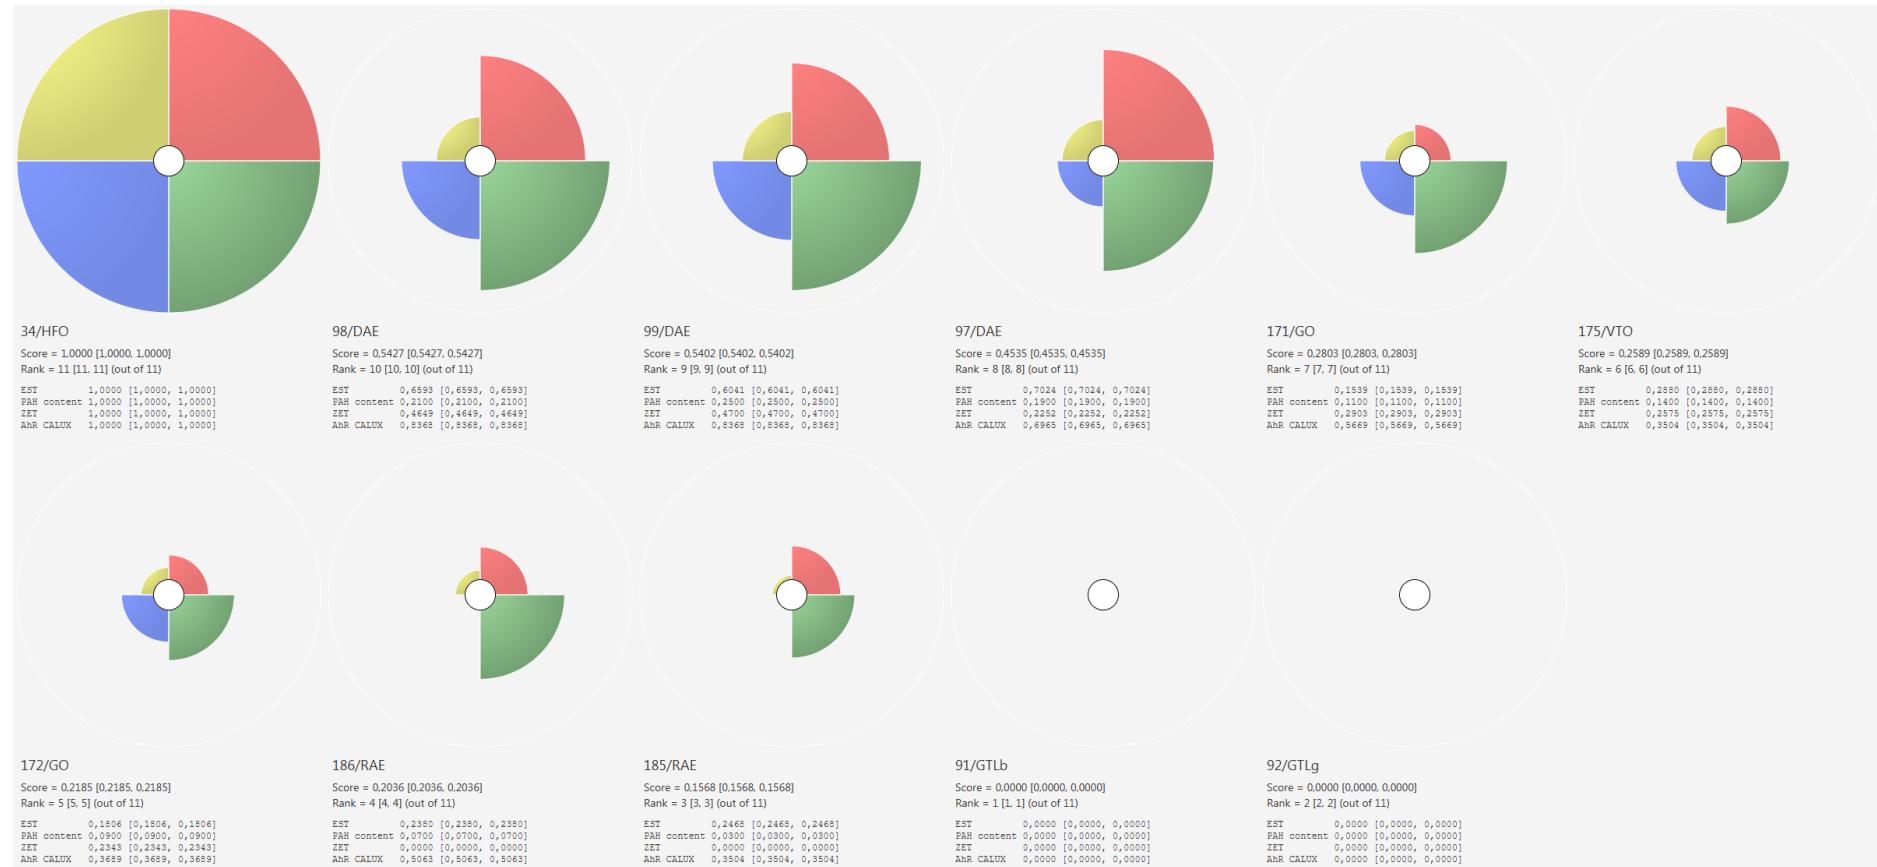

Appendix F: Correlation between *in vitro* developmental toxicity potency in the ZET (BMC50s) and specific PAH content (2- to 7-ring PAHs) present in each PS sample

Appendix G: Bioactivity profiling using the ToxPi GUI

ToxPi score of each test compound is also listed below the pie-chart (ToxPi profile).

Data are taken from the ZET, EST, AhR CALUX assay, and PAH content of the respective test compound of the present study: DMSO-extracts of 9 PS and 2 GTL products.

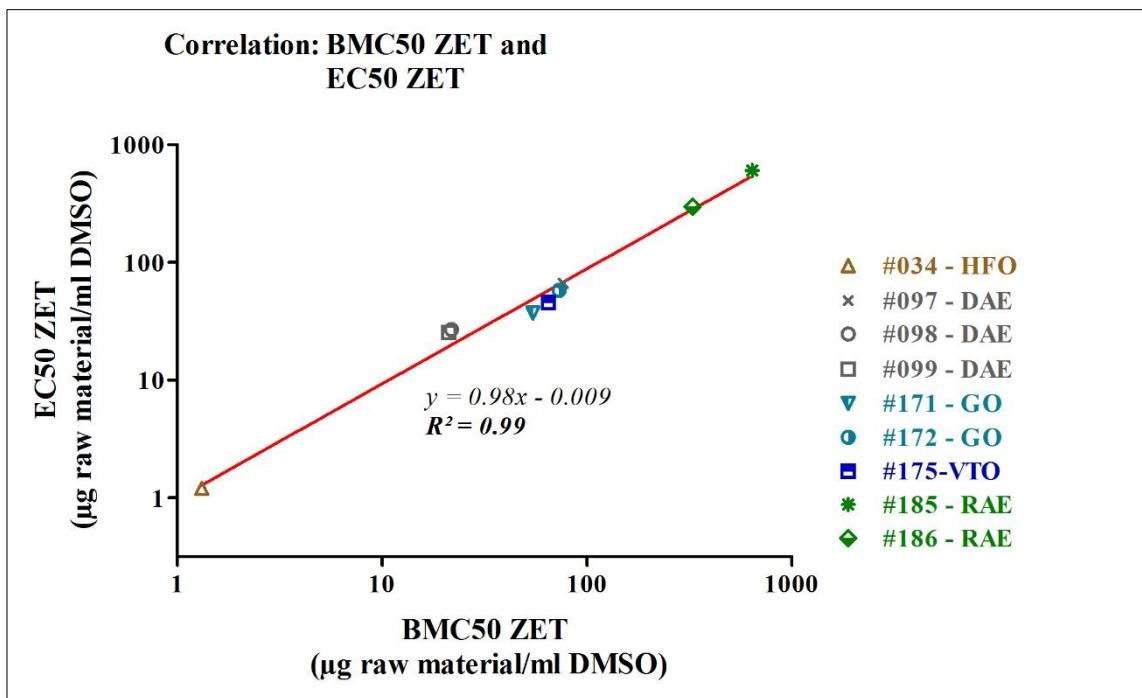

Appendix H: Schematic overview of the zebrafish embryotoxicity test (ZET) performed in the present study

Appendix I:

Correlation between the calculated BMCd50s, as determined using the BMD software from US-EPA, and EC50s, as determined using the GraphPad Prism software, in the ZET of the present study.

Comparison of results when using either (A-D) the BMC50s-ZET, as determined using BMD software from US-EPA, or (E-H) the EC50s-ZET, as determined using GraphPad Prism 5.0; for the correlation analysis of the present study.
