

**ANNOUNCEMENT OF A COMPETITIVE  
CALL FOR  
ADDITIONAL PROJECT PARTNERS**

**in the area of life science, genomics  
and biotechnology for health**

**ReProTect** is an Integrated Project founded by the EU within the 6<sup>th</sup> Framework Program for Research. This Integrated Project, assembling 35 different European partners from Academia, Gov. Inst. and Industry intends to develop in vitro tests and testing strategies for reproductive toxicity testing.

Within the project the uptake of new partners for the subarea "Implantation" is foreseen in order to develop in vitro tests that are able to provide relevant information of chemical effects during the phase of embryo implantation.

You will find further information on aims, requirements and research work to be done in the area of News events and meetings at: <http://ecvam.jrc.it/index.htm> (ReProTect meetings and organisation)

Date of close of call: **April 6, 2006**

Time of close of call: **17h00 Brussels time** (electronic proposal submission only)
